

Task Feature : Close Job

Feature: Close Application

Actor: Recruiter

1. Epic

Job Management Application

2. User Stories

Story 1 : Recruiter Closes an Active Job

As a candidate

Recruiter

I want to

close an active job listing

So that

the system stops accepting new applications for that job

Acceptance Criteria (Given / When / Then)

Given : an active job (`IsActive = true`) and an authorized recruiter

When : the recruiter sends a request to close the job

Then : the job state updates (`IsActive = false`, `ClosedAt = DateTime`) and a `200 OK` response is returned.

Given : A job has existing applications in states such as `Applied` or `UnderReview`.

When : The recruiter closes the job.

Then :

The applications remain in their current states.

No existing application is deleted or modified.

Recruiters can still access the applications.

Priority: `Mid` **Story Points:** `3`

Story 2 : Prevent Applications to Closed Jobs

As a

Candidate

I want

the system to prevent me from applying to a closed job,

So that

Api reject request

Acceptance Criteria (Given / When / Then)

Given : A job has `IsActive=false`.

When : A candidate attempts to submit an application.

Then : Api rejects request with `400 BadRequest`.

Priority: `low` **Story Points:** `2`

3. Task Breakdown — Story 1

#	Task
1	update job <code>IsActive = false</code> and <code>ClosedAt = DateTime</code>
2	<code>Delete /api/jobs/{id}</code>

#	Task
3	The applications remain in their current states Applied or UnderReview
4	Implement ownership check for recruiter close job
